

The Best of 2018 Design Miami/

12.11.18

Caroline Williamson

Once again, we headed down to Miami Beach to see what this year's Design Miami/ had to offer. The show always exhibits a well curated collection of artists, designers, and galleries that bring a mix of work from the up-and-coming to the well-established and everything in between... Théophile Blandet's work, showcased by Functional Art Gallery, comprises industrial plastics and resin that looks as if it's been dripped, stretched, bubbled up, and more to get the finished results.
